

Practicing Grid

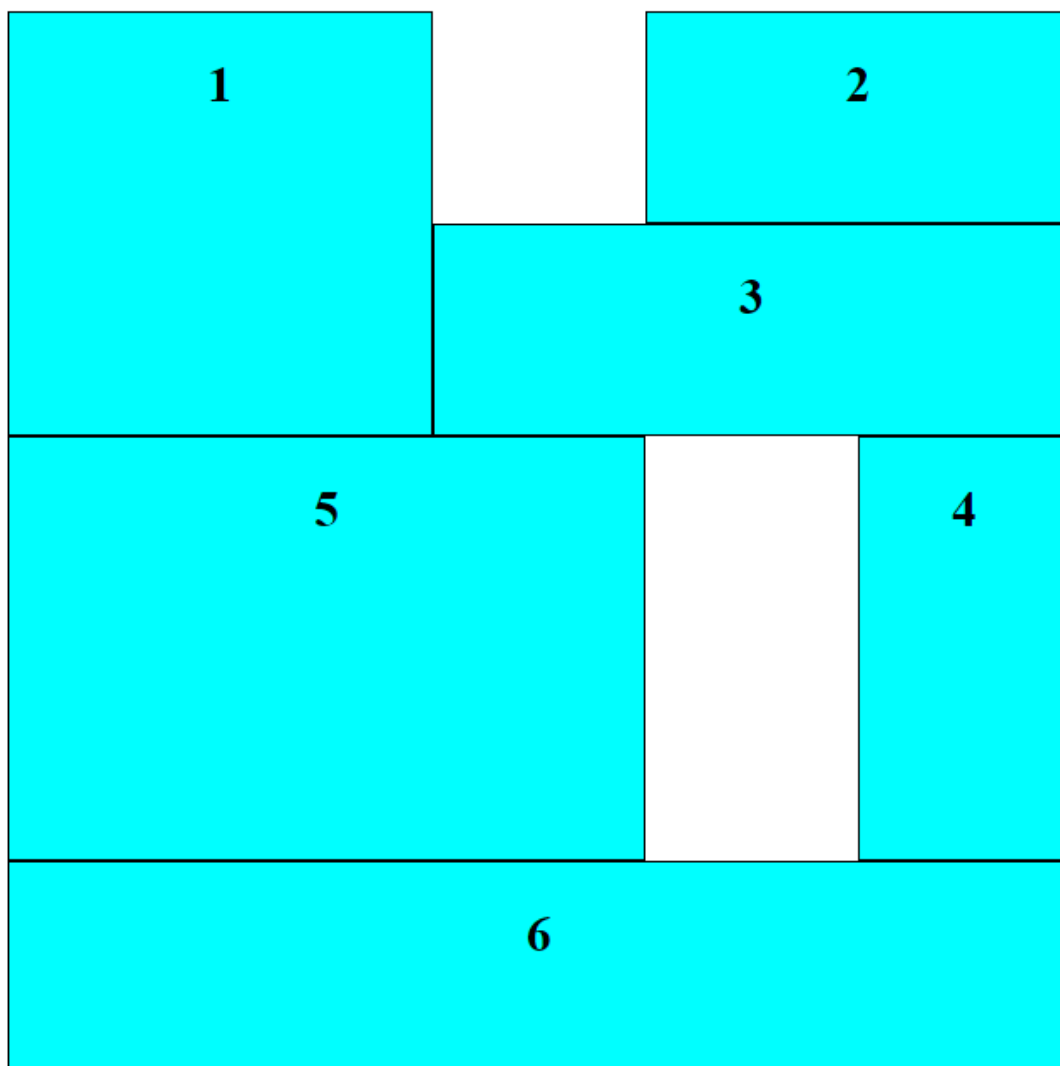

Project name: basic-grid-proj

Practice grid commands

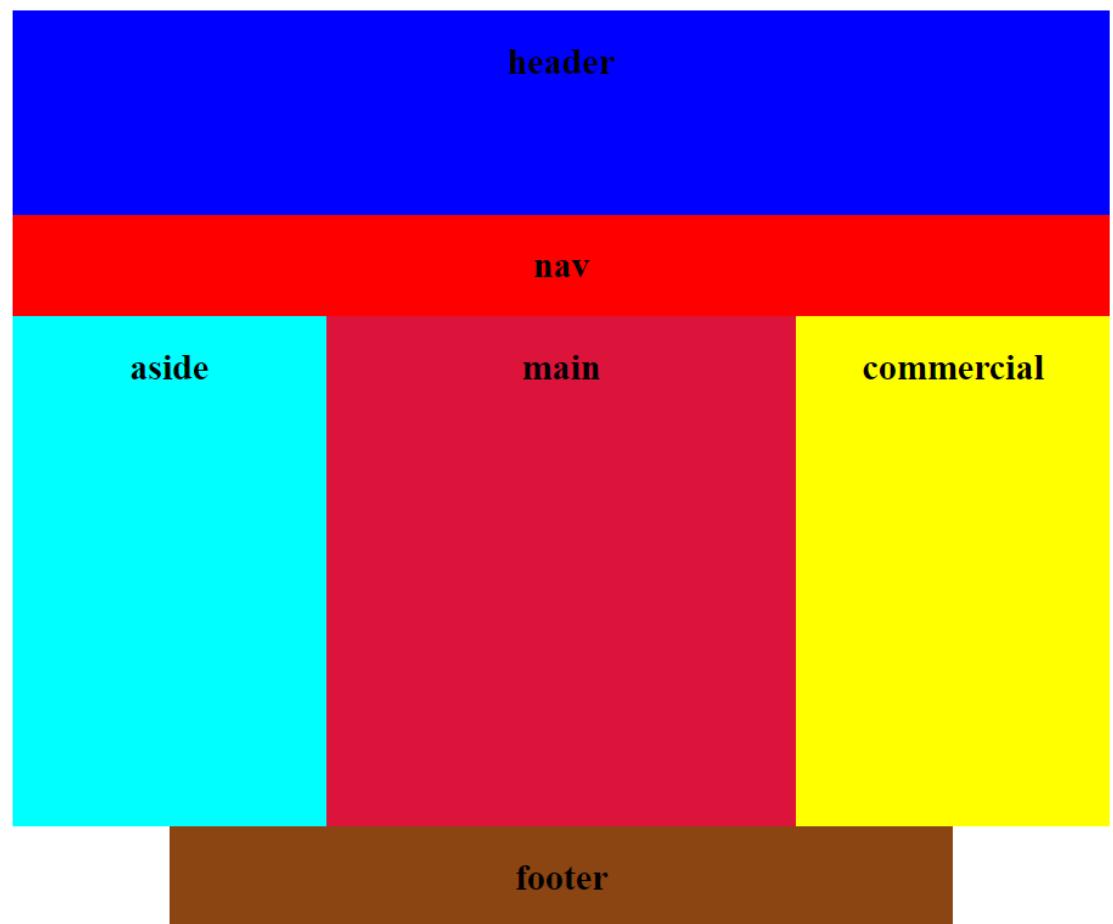

Play this game: <http://cssgridgarden.com>

Recreate the following layouts:

1. Using grid-template-columns, grid-template-rows, grid-row & grid-column

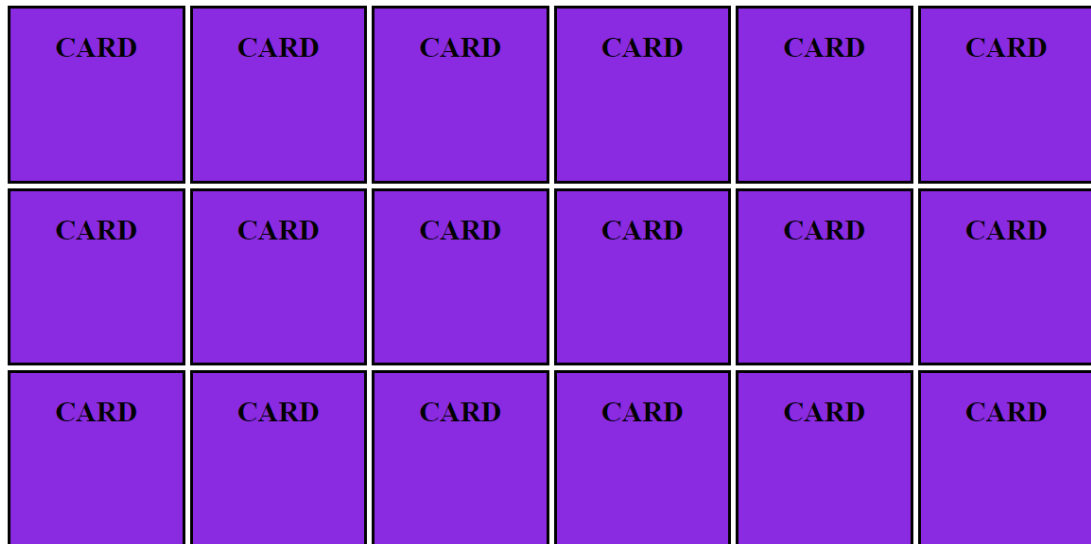

2. Using grid-template-areas & grid-area

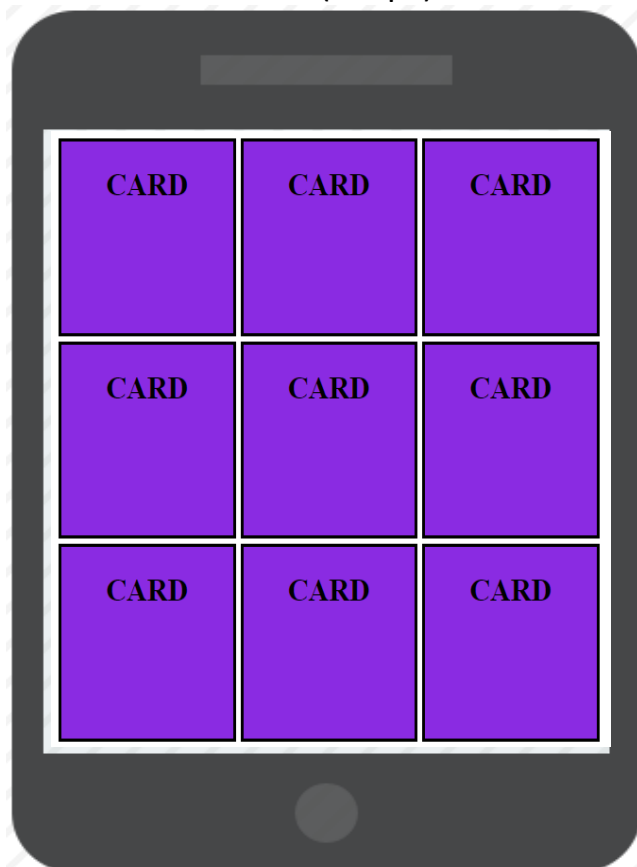

3. Bonus: Create a responsive cards layout, so columns and card's width will change correspondingly to viewport width. Add a gap between the cards. Use grid-gap, grid-template-columns, repeat, auto-fill & minmax.

Desktop (1024px):

Tablet (780px):

Mobile: (420px)
